

## Dashboard

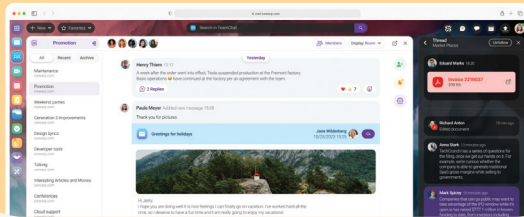

Basically a virtual town square, where you'll spend most of your day. It only takes one click to get to your emails, files, calendar, meetings, lunch orders, or cat videos.

## TeamChat

If Dashboard is the town square, then TeamChat is your local tavern. It's a place to discuss tasks with coworkers, brew fresh plans, or even keep track of company gossip. Plus now it lends a hand with embedded ChatGPT functionality.

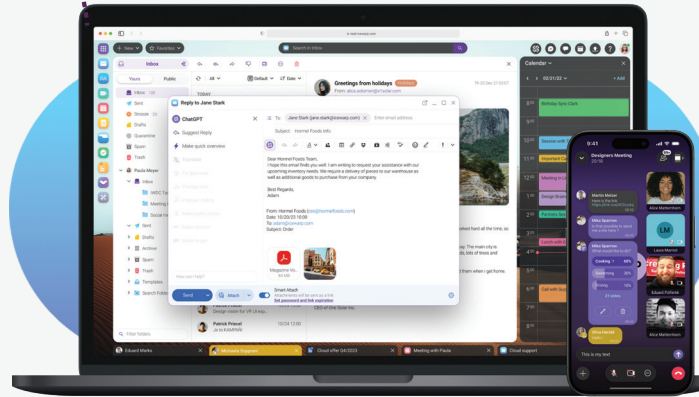

## ChatGPT integration

Turn your existing ChatGPT subscription to power your office agenda.

# What you'll find in the IceWarp virtual office.

## Email

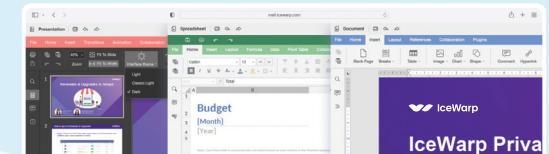

The cornerstone of IceWarp. In addition to usual email features like folders, flags, rules and spam filtering, you can share directly to TeamChat and seamlessly send large attachments with SmartAttach. Plus now our AI Buddy helps with responding to emails, translates over 100 languages or even creates a brief summary.

## Documents

Office documents don't hang in a vacuum, which is why we support Microsoft formats. And why we enable you to share them for real-time editing, including full access tracking.

## Calendar

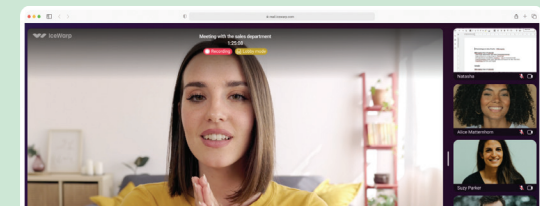

Where would modern humans be without a planning tool, right?

## Conferences

Jamming up to a thousand people in one room is never a good idea. So organize a virtual conference instead. It'll be way easier to moderate, and you can always switch off the camera if you get the jitters.

### Quick Conferences

Starting an IceWarp Conference takes on average **5 clicks less** than using a competitor's tool – we counted it. Imagine how much time it saves you in a year.

### Never-Ending Updates

With IceWarp, you only need a browser because we take care of all the updates behind the curtain. So the **product is always up to date**, but you don't have to waste time updating it.

### Peak Efficiency

Work from home, work on the train, work on your phone, work from a submarine, plane, beach... you can even work at your wedding. The point is that you can finally **work from anywhere** you'd like.

### What are we?

True alternative to M365 or Google Workspace with a global reach.

### How long we've been on the market?

Since 2001.

### Where we can store your data?

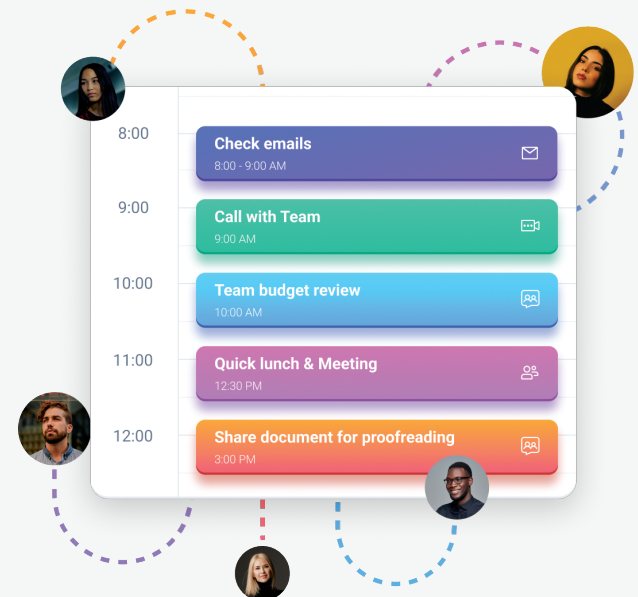

Everywhere, because we cater to the needs of our clients. For example, one data center is located in Bahrain. We also operate data centers around the world close to our customers - in Czechia, Italy, Mexico, USA and India.

### Who are our customers?

Recognized brands like Tata Electronics, Thane Bharat Sahakari Bank Ltd, Kalpataru, PHFL, Teleperformance rely on IceWarp.

**Email. Collaboration. Office. All in a single package.**

**True alternative to Microsoft 365 & Google Workspace**
